maoun045@uottawa.ca | (613) 890-9865 | github.com/Mathewaoun | linkedin.com/in/mathew-aoun | mathewaoun.github.io

## EDUCATION

### University of Ottawa

BASc in Software Engineering, Co-op

Ottawa, ON

Expected Dec. 2026

- GPA: 3.7/4.0 (Dean's List)
- Relevant Courses: Software Architecture, Operating Systems, Design and Analysis of Algorithms, Databases

## EXPERIENCE

### Department of National Defence

Software Developer, Co-op

Ottawa, ON

May 2026 – Present

- Led a **4-developer team** to build an internal **10+ screen** service desk platform from scratch on the Microsoft Power Platform, replacing email-based intake with a centralized ticketing system handling **~20 requests/day**
- Built a self-service request portal for employees and contractors covering **10+ request categories**, each with its own dynamic forms and required documents, bringing all request files under **one tracked system**
- Built an admin portal in Power Apps (Power Fx) on SharePoint with **7+ admin controls**: status updates, requester messaging, role-based access, per-category **SLA configuration**, editable email templates, and on-behalf-of tracking
- Fully automated client notifications with event-triggered Power Automate flows on every ticket creation and status change, **eliminating manual follow-ups** for staff
- Ran weekly requirements sessions with the client, reviewed all team code, and drove releases through **3 environments (Dev, QA, UAT)** toward production deployment

### Brookfield Renewable

End User Services, Co-op

Ottawa, ON

Sept. 2024 – Dec. 2024

- Developed PowerShell automation scripts that parse Excel data to run employee offboarding end to end, cutting manual effort and **reducing security risk** from lingering account access
- Reprovisioned devices from departing employees by reimaging and reconfiguring **IPv4/IPv6** via command-line tools and reconnecting them to the corporate network, so hardware was **reused, not replaced**
- Resolved network, hardware, and software incidents through the ITSM ticketing system and configured new-hire devices, **minimizing employee downtime**

### Shared Services Canada

Software Developer, Co-op

Ottawa, ON

Jan. 2024 – Sept. 2024

- Built an internal web application that automates offer letter generation, turning a manual editing process into a **single-click workflow** for HR
- Developed configurable templates with Power Apps (Power Fx) and JavaScript on a SharePoint back end, standardizing letters across hiring teams and **reducing data-entry errors**
- Automated PDF generation and reporting with Power Automate and Power BI, **shortening hiring turnaround**

## PROJECTS

### Network Change Validator | Python, Netmiko, pytest, Containerlab, Nokia SR Linux

Sept. 2026 – Present

- Building a Python tool that **snapshots network state** (routes, OSPF neighbors, interfaces) before and after config changes and **flags what broke**
- Testing on a **multi-router IPv4/IPv6 OSPF lab** with Netmiko SSH automation, pytest checks, and Slack alerts

### MATTO Entertainment | Founder & Developer | React Native, TypeScript, Supabase

Apr. 2025 – Present

- Founded an event entertainment business and built its full technology platform, supporting **200+ events** and earning **150+ Google reviews**
- Launched a React Native (Expo) **iOS app on the App Store (20 screens, 25K+ lines of TypeScript)** in June 2026, sharing one Supabase (PostgreSQL) backend with the company website
- Engineered 24 server-side functions, including a **booking API with 96 routes**, and managed schema changes through **200+ database migrations**
- Delivered guided booking, e-signed agreements, online payments, and an admin dashboard with scheduling, crew management, and **automated push, SMS, and email notifications**

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, Java, Python, SQL, C, PowerShell

**Frameworks & Platforms:** React, React Native, Node.js, Supabase, Power Apps, Power Automate, SharePoint

**Tools:** Git, Docker, Linux, PostgreSQL, pytest, JIRA, Agile
