EDUCATION

University of Ottawa

BASc in Software Engineering, Co-op

- CGPA: 3.9/4.0 (Dean's List); \$2,000 Admission Scholarship

Ottawa, ON

Expected Dec. 2026

EXPERIENCE

Department of National Defence

Software Developer, Co-op

Ottawa, ON

May 2026 – Present

- Led a **4-developer team** to build an internal **service desk platform** from scratch on the **Microsoft Power Platform**, replacing an email-based intake process with a **centralized ticketing system**
- Designed a **status-driven ticket lifecycle** with **configurable due dates per request type**, giving staff clear visibility into workload, deadlines, and incomplete requests
- Built an **admin portal in Power Apps (Power Fx)** on a **SharePoint** data layer for triaging tickets, flagging missing documents, and returning requests, cutting back-and-forth email with clients
- Fully automated client notifications** with **event-triggered Power Automate flows** on every ticket creation and status change, eliminating manual follow-ups for staff
- Ran **weekly requirements sessions** with the client, performed **code reviews**, and drove releases through **Dev, QA, and UAT** toward **production deployment**

Brookfield Renewable

End User Services, Co-op

Ottawa, ON

Sept. 2024 – Dec. 2024

- Developed **PowerShell automation scripts** that parse Excel data to run **employee offboarding** end to end, cutting manual effort and **reducing security risk from lingering account access**
- Reprovisioned devices** from departing employees by reimaging and reconfiguring **IPv4/IPv6** via **command-line tools** and reconnecting to the **corporate network**, so hardware was **reused, not replaced**
- Resolved network, hardware, and software incidents through the **ITSM ticketing system** and configured new-hire devices, minimizing employee downtime

Shared Services Canada

Software Developer, Co-op

Ottawa, ON

Jan. 2024 – Sept. 2024

- Built an internal web application that **automates offer letter generation**, turning a manual editing process into a **single-click workflow** for HR
- Developed **configurable templates** with **Power Apps (Power Fx)** and **JavaScript** on a **SharePoint** back end, standardizing letters across hiring teams and **reducing data-entry errors**
- Automated **PDF generation** and reporting with **Power Automate** and **Power BI**, shortening hiring turnaround

PROJECTS

MATTO Entertainment | Node.js, Supabase, PostgreSQL, REST APIs

Apr. 2025 – Aug. 2025

- Built a **full-stack web app** with **Node.js** and **Supabase (PostgreSQL)** for data storage and **access control**
- Integrated **external REST APIs** to display **live customer reviews**, retrieving business data dynamically per user interaction

Partners Auto Parts | React.js, Git

Jan. 2025 – Apr. 2025

- Developed a **B2B web application** in **React.js** with **reusable components** for partner-facing workflows
- Delivered a **responsive, cross-browser, accessible** interface, managed with **Git** through iterative releases

Hotel Booking System | SQL, ER Modeling

Jan. 2024 – Apr. 2024

- Led development of a **full-stack booking system** with **criteria-based search and filtering** powered by **SQL**
- Designed **ER diagrams and relational schemas** and implemented **role-based access control** for customers, employees, and administrators

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, C, PowerShell

Frameworks & Platforms: React, Node.js, Power Apps (Power Fx), Power Automate, SharePoint, Power BI, Supabase

Tools: Git, PostgreSQL, Linux, JIRA, Agile, Unit Testing
